REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Prior art, such as US 6166118, teach the emulsification of functionalized polyolefins by combining them with a emulsifier and water.

Other more closely related prior art, such as US 5389440 and WO 99/55744, teach the preparation of emulsions from emulsifiable polyolefins, wherein the polyolefins (wax) are sufficiently functionalized with water-soluble compounds, to make them self-emulsifiable.

However, no prior art was found to teach or sufficiently suggest a process for making an aqueous emulsion of self-emulsifiable polyolefin which comprises the steps of:

- a. providing a mixture of :
 - i. at least one polyolefin possessing a first reactive functionality and having a weight average molecular weight of at least about 30,000; and
 - ii. at least one hydrophilic polymer possessing a second reactive functionality being reactive with the first reactive functionality of polyolefin and having a weight average molecular weight less than that of polyolefin ,
and
- b. heating the mixture of step (a) to a temperature at or above the melting point of polyolefin,

Art Unit: 1713

- c. first reactive functionality of polyolefin reacting with second reactive functionality of hydrophilic polymer at said temperature to provide a self-emulsifiable polyolefin; and
- d. (c) adding an emulsion-forming amount of water to the self-emulsifiable polyolefin of step (b) to provide an aqueous emulsion of the self-emulsifiable polyolefin.

Thus, claims 1-34 to said process and the product of said process are allowable.

Also, the processes of using said allowable product and products thereof of claims 35-68 are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
